

**METHOD, SYSTEM, AND PROGRAM PRODUCT FOR CUSTOMIZING A USER
INTERFACE**

ABSTRACT OF THE DISCLOSURE

Method, system, and program product for customizing a user interface. The user interface is adjusted by including a shortcut for one or more object operations. Each shortcut is selected based on a user, an object being displayed in the user interface, and/or a history of object operations. The selection can be based on the frequency that the user has previously selected object operations for the object.
